

FreeAgent™ Pro

Access your content from anywhere,
share it with anyone and sync it to almost anything.

The FreeAgent Pro external hard drive provides anyone who's serious about their digital content with the freedom to stay connected to it. It's all about having your latest files right where you need them, when you need them. Automatically duplicate and move the content you select to multiple locations like email and contacts to your iPod™, photos to an online photo account, your entire "My Documents" folder to FreeAgent, or move it to your own online space* where you can access it from any browser 24/7 or share it with anyone you choose.

With up to 1 Terabyte and an ultra-slim design for a clutter-free desktop, your FreeAgent Pro external hard drive helps keep you safe from goof-ups by automatically saving new versions of your content that you can easily access if need be. And should something happen to your PC, you can roll back your Windows operating system, settings, and applications to a point in time when they ran smoother, like before a virus attack. Even though the system settings are taken back in time, updates to photos, music and critical data files are kept current.

Besides all the great benefits of the FreeAgent Pro software, you get triple connectivity that is both Mac and Windows compatible. No matter what computer you are connecting with, this innovative future-proof technology will keep your FreeAgent Pro moving data to exactly where you want it. It provides eSATA connectivity at blazing speeds up to 3Gb/sec, FireWire® 400 connectivity for Macs and digital video users, as well as USB 2.0 connectivity, the most commonly used interface in the world today.

Just connect the interface and power cords to your PC, run through the simple software wizard, and you're ready to go. To help eliminate even the slightest of worry, we've included technical support and a five-year limited warranty.

FreeAgent Pro external hard drive. Because being connected to your content is better than just collecting it.
