Retail Product Overview

MIRRA SYNC AND SHARE PERSONAL SERVER

The total solution for managing digital content

Access, share, sync, protect and enjoy your data and digital content—

from anywhere!

The content-management solution that provides multiuser data protection, synchronization and sharing for homes and businesses

Key Features

The *On-Demand World* connects all of us to our own personal digital content. Whether self-created or purchased, we want it wherever we are, whenever we want it. Now there is a product that takes care of our content and let's us get to it from anywhere, at any time.

Introducing the Mirra Sync and Share Personal Server, a content-management solution that provides multiuser data protection, synchronization and sharing for homes and businesses. Mirra is the only product that combines all of these benefits, along with free online user accounts, allowing secure remote access and file sharing.

- **Access—**Retrieve digital content via the Internet any time.
- **Share**—Share files with anyone simply and securely.
- **Sync**—Sync content automatically between networked computers.
- **Protect**—Continuous data protection for networked Macs and PCs.
- **Enjoy**—Connect to your content from wherever you are.

Best-Fit Applications

- Small Office/Home Office (SOHO) and Small Businesses (SMB) that desire reliable, automatic network backup, secure file synchronization between multiple employees (or customers), and data sharing among coworkers at both local and remote locations over the Internet
- Digital enthusiasts with one or more computers who want easy backup and file sharing locally and with remote friends and family

MIRRA SYNC AND SHARE PERSONAL SERVER

The total solution for managing digital content

Seagate

The Seagate Advantage

Seagate® Mirra Sync and Share Personal Server combines effortless digital content protection with secure remote access, and sync and share. Connected to your router, Mirra continuously and automatically protects important content on all your networked computers, while providing 24x7, over-the-web access to your content from all your computers. With Mirra, you can simply and securely share photos, files and content with other networked computers or with anyone who has an e-mail address. These files can be automatically synchronized among networked computers, ensuring others are up to date with the latest changes to key documents.

Mirra is so easy to install—in just minutes you'll be ready to sync and share, while enjoying networked file protection. And Mirra makes all these things possible on both Windows and Macintosh computers.

Features and Benefits

Automatic

Mirra automatically synchronizes content—including entire data libraries—between networked computers. Receive the latest file updates as they happen.

Specifications	
Capacities (GB)	320, 500
Network Requirements	High-speed Internet connection; router with available Ethernet port
System Requirements	
Windows	Pentium III Processor (or newer); Windows XP Home or Professional Edition, Windows 2000 Pro, Windows 2000 or 2003 Server; 256 Mbytes RAM and 50 Mbytes free hard disc space
Macintosh	PowerPC G3, G4 or G5 processor, OS X 10.3.9 (or higher); Intel Core Duo or Core Solo processor, OS X 10.4.6 (or higher); 256 Mbytes RAM and 50 Mbytes free hard disc space

Secure

Software and online services let you share files securely with friends, family and coworkers. Password-protect your folders and provide access to them via Seagate.com.

Continuous

Mirra continuously backs up the content on your networked computers. You choose which folders to protect and Mirra does the rest—including saving as many as eight previous file versions.

Accessible

Stay connected to your content with secure remote access via Seagate.com. Retrieve your files from wherever you are—whenever you want them.

Effortless

Set up your Mirra in minutes—no special technical knowledge is required.

Data Guarantee

If one of your computer hard drives fails, all data backed up on your Mirra Sync and Share Personal Server will be restored. We guarantee it. Seagate will assist you in the restoration and, if necessary, Seagate Data Recovery Services will commit up to $1000 to recover and restore your data.

Limited Warranty

One year parts and labor.
